MISSION

Power52 Foundation's mission is to break the cycle of poverty, unemployment, underemployment, and incarceration in our urban communities across the nation through economic empowerment and clean energy access. **Our core values are:**

Integrity

Trustworthiness

A measurable impact

Equal opportunity & Inclusiveness

Cherie Brooks, Visionary Co-Founder, President & CEO and **Ray Lewis**, Co-Founder

POWER52 FOUNDATION

Power52 Foundation not only engages the community through our training, but also by building relationships with community members and leaders. To accomplish this goal, **we provide toy drives, mentoring, clean energy education opportunities, and city-wide community engagement events in partnership with local city and community officials.**

POWER52 ENERGY INSTITUTE

ENERGY PROFESSIONAL TRAINING PROGRAM

Power52 Foundation has created a successful model for training residents from historically marginalized communities to participate in Maryland's booming clean energy economy. Power52's training brings workforce development, resiliency, and clean energy solutions to low- and medium-income communities. The curriculum we teach is based on the solar/clean energy industry. Students learn to install solar panels and electrical systems, with at least 20% of the training being hands on in our lab. **Our workforce development programs recognize that job training alone does not ensure a successful career, especially for individuals who have not had the opportunity to participate in the workforce in skilled positions in the past.**

.....

Our training programs includes extensive case management throughout the program and for twelve months after graduation, to ensure that individuals employed through the program receive the support they need to be successful. In addition, the curriculum includes "soft skills" training to develop competencies such as professional work habits and appearance, time management, conflict management and problem solving. Ultimately, the training programs yield marketable skills and credentials for success in an industry that has significant need for skilled workers and pays a living wage.
